PROBLEM

The Challenge of Certificate Attestation.

Managing and verifying certificate attestation data on the blockchain is time-consuming and complex.

Data Accessibility & Aggregation

Difficulty in accessing & aggregating comprehensive attestation data linked to specific blockchain addresses

Operational Efficiency

Manual data collection wastes time that could be used for strategic work.

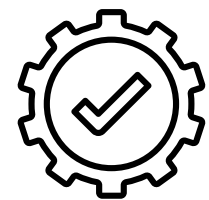

Analytical Hurdles

Ineffective tools slow down certificate analysis and problem detection.

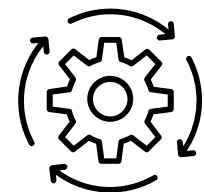

SOLUTION

We present a tool designed to revolutionize how certificate issuers interact with blockchain data:

One-Click Data Extraction

'BlockBadge Data Extractor' features a simple download button, allow users to retrieve all certificate attestation data with a single click.

Automated Data Aggregation

It automatically compiles data from various blockchain addresses, providing a comprehensive view of certificate issuance.

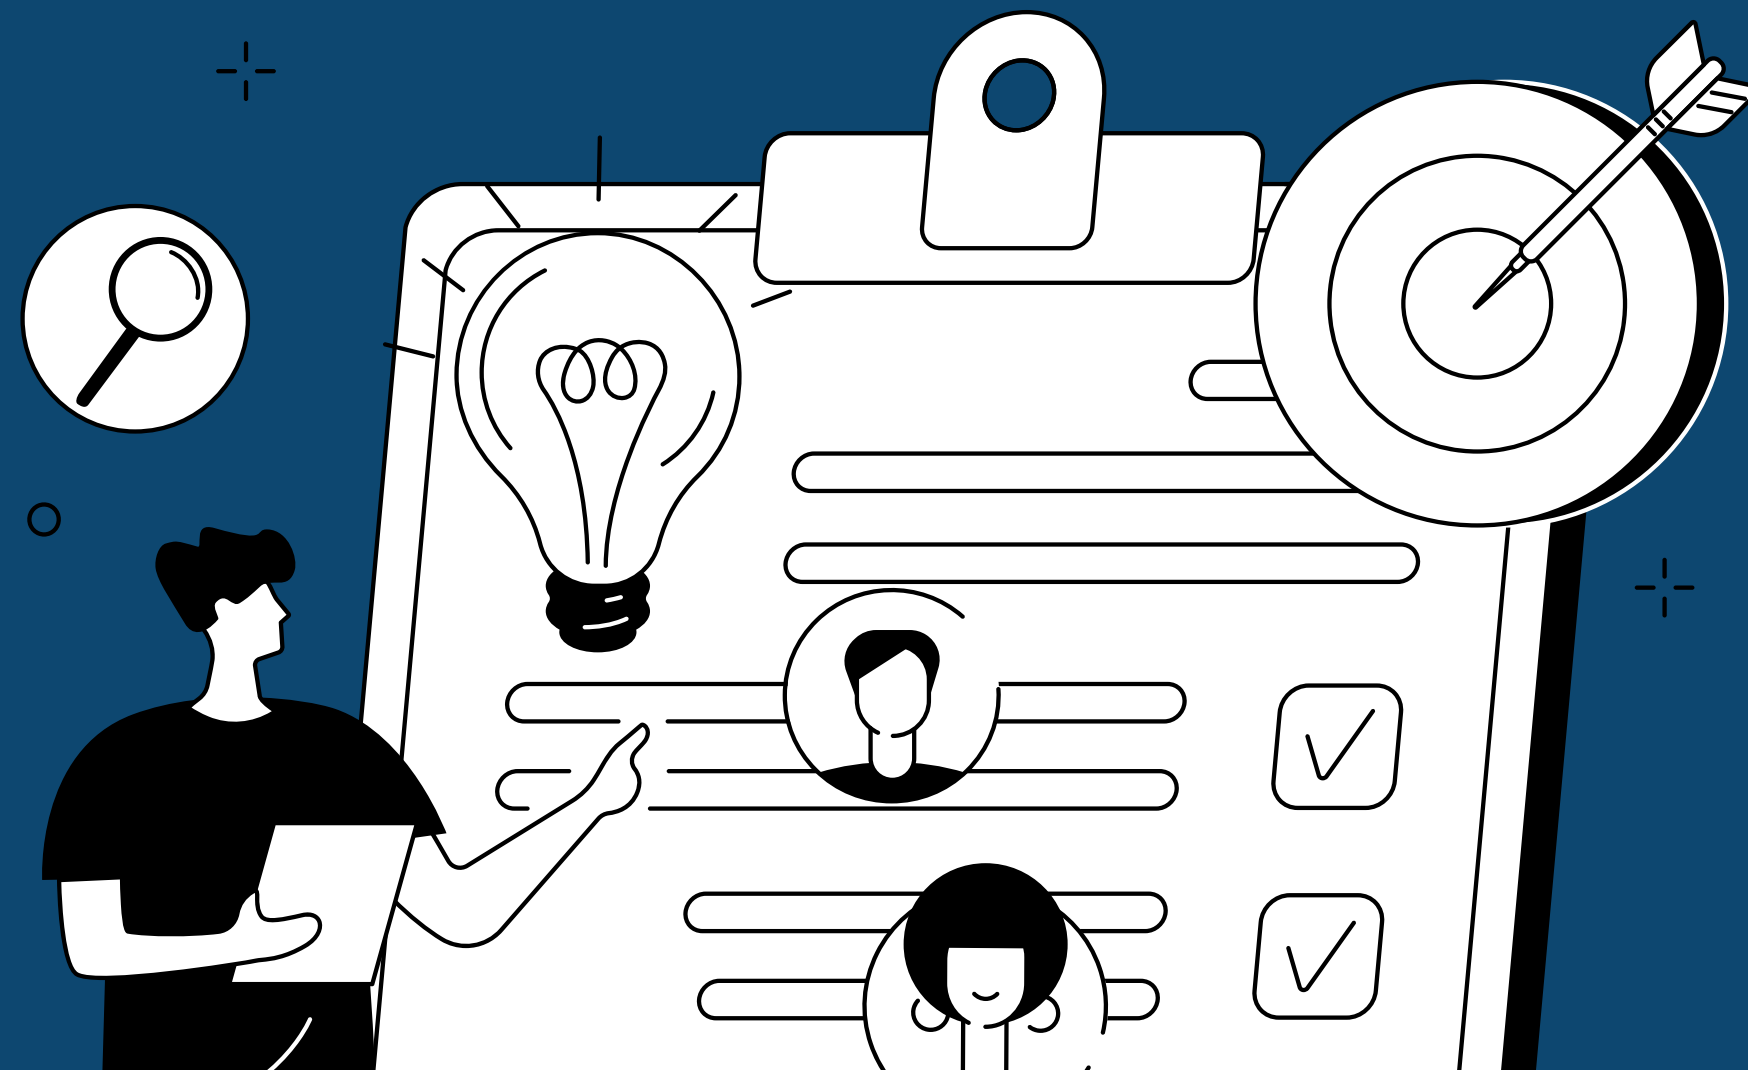

Save Time & Data

Cuts manual data extraction time, allowing focus on strategic tasks.

PRODUCT AND SERVICE

Effortless Data Management with BlockBadge
Data Harvester

INSTANT DATA RETRIEVAL

A single click on our 'Download' button lets users instantly pull all certificate data from the blockchain.

CSV EXPORT

Automatically formats the data into a CSV file for easy analysis and reporting.

MOON WALLET SDK

Leverages Moon APIs for robust, secure data access and storage.

PROJECT TARGET

Summary of the project.

With vision of streamline and personalize the experience of attestation data retrieval, ensuring that users have full control and flexibility over the information they need, when they need it

MAIN GOAL

Implementing a 'Download Attestations' button that empowers signed-in users to effortlessly retrieve a record of their attested transactions directly into a downloadable file

SIDE QUEST

- Address Flexibility: Download attestation data from any address without logging in.
- Date-Range Selection: Pick dates to extract tailored data sets.

BlockBadge Platform

Proof of Excellence, Verified Securely

BlockBadge is an all-in-one recruiting solution for candidates that includes:

- ✓ Credential Verification
- ✓ Background Checks
- ✓ Developer Reputation
